RADIA SYSTEMS SECURES PROFESSIONAL SERVICES CONTRACT FROM THE PORT OF LONG BEACH SECURITY DIVISION

Tuesday July 29, 2008 8:30am ET

LOS ANGELES-(BUSINESS WIRE)- July 29, 2008 - Radia Systems is pleased to announce that it has entered into a prime contract with the Port of Long Beach Security Division. The contract will allow Radia to broadly provide technology consulting and project management on various initiatives slated for implementation within the port through Department of Homeland Security grants and other federal, state and local funding.

Mr. Gregory N. Hartwell, President & CEO of Radia Systems stated: "This contract with The Port of Long Beach is a great milestone for our company. It further demonstrates our strategic commitment to establishing partnerships with marquee customers whose high profile and reputation will open doors to new markets."

The Port of Long Beach (POLB) is currently in the process of building a state-of-the-art, three-story Joint Command & Control Center (JCCC) at Pier F. The building will be the focal point for numerous security and monitoring systems that have been purchased or are in development at the Port. Radia's first assignment is a two phase project through an Urban Areas Security Initiative (UASI) grant valued at \$425,000. The first phase is to conduct an integration feasibility study on Incident Command (IC) hardware and software technology for the Port's Software Management Platform. The second phase will be to procure and program manage the implementation of the IC system at the Port's new JCC Center.
